About

There are over a thousand puzzles that range from easy to hard. Our puzzles are divided into four levels of difficulty, ranging from easy (level 1) to extreme (level 100). This book is meant for the experienced Sudoku player, so there is little room on the puzzle for notetaking. Each puzzle page has 4 puzzles that are labeled with names and are sorted alphabetically so that the solutions can be looked up in an organized way.

RULES

Sudoku is a logic-based number puzzle game that involves filling a 9x9 grid with digits from 1 to 9, so that each row, column, and 3x3 sub grid contains all the digits from 1 to 9 without any repetition. The puzzle starts with some of the grid cells already filled with digits, and the goal is to fill the rest of the grid with digits while following these rules.

To solve a Sudoku puzzle, you need to use logical deduction and eliminate possible digit candidates from each cell until only one possible solution remains. The puzzle is considered solved when all the cells in the grid are filled with digits that meet the above criteria.

Sudoku puzzles are usually classified into different levels of difficulty, ranging from easy to expert, based on the number of pre-filled cells and the complexity of the logical deductions required to solve the puzzle.

Overall, Sudoku is a challenging and rewarding puzzle game that requires both analytical and creative thinking to solve. With practice and persistence, anyone can learn to solve Sudoku puzzles and enjoy the mental exercise and satisfaction that comes with it.

NAVIGATING

The puzzles and solutions are named and organized in alphabetical order. The puzzles are at the beginning of the book, and the solutions are at the back of the book.
